

TAKING A TEST FOR COVID-19

SOME THINGS TO REMEMBER:

1. IT ISN'T SCARY
2. IT DOESN'T HURT
3. IT WON'T TAKE LONG

WHY DO YOU NEED A TEST?

You can have COVID-19 even if you don't have any symptoms (like a cough, or a change in taste or smell)

COVID-19 can make you feel very poorly, and you can spread it to other people if you aren't careful

WHILE YOU WAIT FOR YOUR TEST:

WASH YOUR HANDS

WEAR A MASK

STAND 2M APART

WHAT DO YOU NEED TO DO?

Register for a test (your school will do this for you)

You'll need to take a swab of the inside of your mouth, and up your nose

Wait half an hour for your results

WHAT HAPPENS NEXT?

If your result is negative, this means you don't have the virus

If your result is positive, it means that you might have the virus
